- Medication and chemicals
- Hazardous materials such as bromine, yellow phosphorus and lithium
- Products for printing
- All different sizes steel (coils, tubes, plates, beams and bundled products, ...)
- Raw materials for hygiene products
- ...

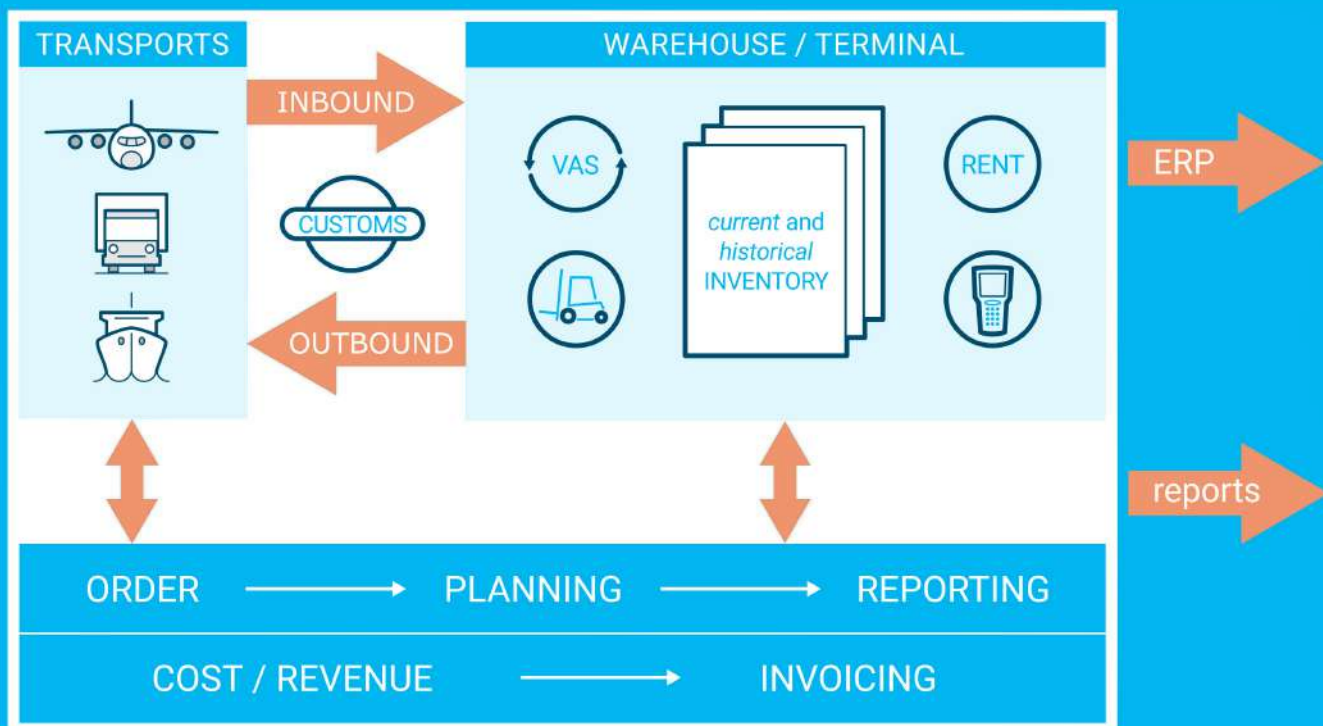

# Supply chain in logistics management

Supply chain management (SCM) plays a very important role within the company. The supply chain generate most of the costs of the company, due to the width and complexity of the function (production, warehouse, distribution). Any inefficiency can create a negative impact to your company. On the other hand, good supply chain management can bring huge benefits and competitive advantage to the company.

SCM is primarily concerned with the efficient integration of suppliers, factories, warehouses and stores so that merchandise is produced and distributed in the right quantities, to the right locations and at the right time, and so as to minimize total system cost subject to satisfying service requirements.

Order processing is the main supply chain management process that initiates the flow of payments. The orders are directly related to customers, invoicing, and accounts receivable. Customers place orders and pay for products through order processing systems. Considering the fact that this process is multiplied to every single customer, the whole process needs to be automated.

## iTOS

iOnLogistics offers you iTOS, a logistics system, ready for the future. iTOS is a complete Terminal Operating System (TOS) for logistics companies that will streamline your administrative, financial and commodity flows. It is all-in-one: web-based state of the art architecture, combined with modules for covering all logistics activities, operations and workflows. It is the global solution that will operate your warehouse to gain maximum value at minimum cost.

As a solution provider, iOnLogistics can offer you the 'iTOS Modular' for standard use or 'iTOS Enterprise' specialized in customized service plans to suit your company's storage and delivery needs. We work together with your company to identify your needs and priorities to create tailored solutions for all your logistical requirements.

# iTOS Modular

**Our standard solution** with minimum cost of investment: the SaaS model of our iTOS Modular will provide you with the finest features of TOS without the need to invest in any infrastructure.

## Advantages

- Streamlining of all your flows
- Flexible system for billing the customer
- Includes our interface for communication with every software
- Comprehensive reporting of executed tasks

## Features

- Order management: inbound, outbound, transports, services (blending, packaging, palletizing, assembling, ...), stock reservations, LIFO/FIFO
- Stock management: shifting, ownership management, warehouse renting, tracking, stock inventory, historical data tracking, flexible data consolidation with outstanding performance
- Financials: tariffing, revenue calculation, VAT management, customer/supplier invoicing
- Partners: flexible roles and properties, address management, events
- Internal companies: data filtering, security restrictions
- Reporting and document management: stock reports, operations (packing and picking list, ...), transport (CMR, delivery note, ...), invoices, generating/printing of PDF, Excel, Word, text
- Product configuration: dynamic (stock) properties, dynamic units (virtual and physical)
- Role-based security
- Flow-oriented UI

# iTOS Enterprise

**Our 100 % customized solution**, a full-featured and custom-tailored process. This management system for the future has an unrivaled flexibility to fulfill all your logistics needs.

## Advantages

- Flexibility due to personal approach (e.g. customized billing, deliveries, ...)
- Cloud solution: no IT infrastructure necessary
- Various treatments and rates for each individual client
- Individual reporting of executed tasks (e.g. per day, per item, ...)

## iOnLogistics

We deliver innovative and high-quality solutions for logistics management. Our headquarters are based in Belgium, near Antwerp, at one of the most prominent trade and cargo hubs of the world. Our mission is to optimize the costs of running your business while maximizing day-to-day operational efficiency.

## Why choose iOnLogistics?

Finding the right solutions for your company's logistics questions, increases profitability and promotes your corporate reputation for reliability. We offer an outstanding range of logistics services.

Our platform logistics solutions sets us apart because we provide integrated solutions for all your processes like:

- Order2Cash
- Warehouse Management System (loading, unloading, VAS, storage of goods, HHT, ...)
- Planning tool for transports, persons, assets, ...
- Transport Management System
- Data Portal
- Gate Operating System
- Optimizing operational costs for your business

Our goal is to provide a set of computerized procedures for above mentioned systems, by guiding you from A to Z throughout the entire implementation process. Together with you, we are looking for the right partner for each section so that the global solution fits best with your company's DNA.
